Summary

Software Engineer with 3+ years of experience building high-performance, visually polished web applications. Expert in **React, Next.js, and TypeScript**. Proven track record at Fastn in reducing UI render times by 30% and architecting scalable frontend systems. Passionate about "Product Craft" and delivering high-polish user interfaces.

Experience

Nov 2023 – **Software Engineer**, *Fastn*, Remote (US)

- Jan 2026 ○ Architected end-to-end features for enterprise clients like HP using **React, TypeScript, and GraphQL**.
- Optimized core DataSync UI using **virtualization**, achieving a **30% reduction** in render time.
- Integrated AI-powered Agents (LLMs), designing the full-stack flow with a focus on intuitive visualization.
- Led database migration to PostgreSQL, reducing query latency by 60% and improving responsiveness.

Sep 2021 – **Full Stack Web Developer**, *Core Notion*, Sana'a, Yemen

- Feb 2023 ○ Built and maintained production web applications using PHP and MySQL.
- Conducted user interviews to identify UX pain points, leading to a UI redesign that increased satisfaction.
- Automated manual workflows, saving clients **8+ hours per week** through efficient interface design.

Featured Project

2024 – 2025 **Hira App – AI Decision Engine**, *Personal Project*

A high-fidelity social platform engineered to eliminate "decision fatigue" through localized AI intelligence and seamless user experiences.

Next.js 15, TypeScript, Supabase, Gemini AI, Framer Motion, PWA

<http://hira-app-nine.vercel.app/>

- Developed an AI-driven platform with a **Multi-AI Fallback System** (Gemini, Llama) to ensure 99.9% reliability and bypass rate limits.
- Implemented a comprehensive **Internationalization (i18n) framework** with optimized RTL support and localized AI prompt engineering for the Arabic-speaking market.
- Achieved a **100/100 Lighthouse Performance score** via aggressive code-splitting, tree-shaking, and PWA optimizations.
- Designed a premium UI with high-fidelity micro-interactions and a scalable **Seasonal Theme System** (e.g., Ramadan Mode) via Feature Flags.

Technical Skills

Core Stack **Next.js 15**, React, TypeScript, JavaScript (ES6+), Node.js.

UI/UX **TailwindCSS, shadcn/ui**, Framer Motion, Radix UI, Responsive Design.

Performance UI Virtualization, Code Splitting, Latency Reduction, Profiling.

Education

2021 **B.Sc. in Business Information Technology**, *Twintech University*, Sana'a, *First Class Honors*, CGPA 3.96/4.00.
